The Donny

Hands-free layer packaging

The world's first fully automated packaging machine, without touching the product – that's The Donny! This is case filling in a revolutionary way. With advanced yet simple technology, your bakery products will be packed into cases, organizing them into neat stacks, layer by layer. And even better: without any drop in height. Making this a cost-efficient replacement for pick & place: touch-free, incredibly fast, and perfectly placed bag-in-box.

Check out our video about **The Donny!**

Without a touch

Replace robot or human hands for more hygienic product packaging

Zero falling height

Your products are gently laid, ensuring optimal condition upon boxing

Perfect alternative

No need for robot pick & place, so less maintenance and more cost efficient

6 steps

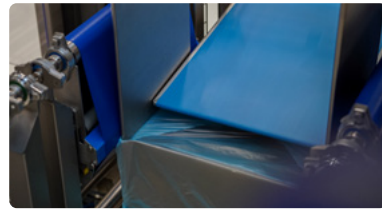

How The Donny works

1 Product carrier input

2 Bag spreading

3 Extending conveyor belt

4 Product transport

5 Layering products

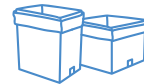

6 Repetitive handling

Our world

We are Niverplast, a Dutch packaging company changing the industry with automation and innovation. With a focus on bag-in-box enclosures, we ensure every product, from bread to meat, is packed with precision and care. Our durable machines work perfectly with our EasyOpen bags for efficient operations.

We believe happy colleagues create happy customers. We care about our team's well-being, ensuring great service and continuous improvement. And we won't stop until you say, "That's exactly what I needed."
